

## **Environmental Clearance (EC) Compliance Report**

Dated: 27/11/2023

M/s RESOURCES PELLETS CONCENTRATES PRIVATE LIMITED (RPCL), No. 2198, BKG House,  
KHB Colony, Sandur, Ballari District, Karnataka - 583119

<b>EC Identification No.</b>	EC23A008KA163015
<b>Dated</b>	30/01/2023
<b>File No.</b>	IA-J-11011/39/2021-IA.II(IND-I)
<b>Project Details</b>	3.2 MTPA Pellet Plant and 3.6 MTPA Pellet feed cum Beneficiation Plant (BP)
<b>Proposal No</b>	IA/KA/IND1/408033/2022
<b>Project site</b>	Somalapura Village, Sandur Taluk, Bellary District, Karnataka

### **Assessment Period: April 2023 to September 2023**

We would like to inform that, M/s RPCL has obtained the EC from MoEFCC on 30/01/2023 vide EC identification no EC23A008KA163015 and CFE from Karnataka State Pollution Control Board vide no CTE-336285 dated 17/02/2023. At present the project is under construction stage, the construction work was started from 2<sup>nd</sup> May 2023, however the Environment Management Plan is being implemented along with project.

<b>Sl no</b>	<b>EC condition</b>	<b>Compliance</b>
<b>A</b>	<b>Specific Conditions</b>	
i.	The project proponent shall comply with all the environmental protection measures and safeguards proposed in the documents submitted to the Ministry. All the recommendations made in the EIA/EMP in respect of environmental management, and risk mitigation measures relating to the project shall be implemented.	Being complied. The project is under construction. However necessary environment protection measures are being implemented
ii.	The project proponent shall utilize modern technologies for capturing of carbon emitted and shall also develop carbon sink/carbon sequestration resources capable of capturing more than emitted. The implementation report shall be submitted to the IRO, MoEF&CC in this regard	Being complied. The project is under construction. However latest modern technologies like tower mill, filter press with dry tailing management etc will be implemented. The above technologies will reduce the carbon footprint of operations compared to conventional methods. Further the carbon sequestration by afforestation is

		already under progress .Carbon footprint reporting will be initiated once the plant is in operation. The report of implementation will be submitted to Ministry
iii.	No diversion of any stream or nallaha shall be permitted in the project site. A robust and full proof Drainage Conservation scheme to protect the natural drainage and its flow parameters; along with Soil conservation scheme and multiple Erosion control measures shall be implemented	Being complied. The project is under construction stage. However actions are initiated. Drainage conservation & erosion control with development of greenbelt will be implemented.
iv.	Somalapura (Population: 863 nos.) and Yeshwanthnagar (Population: 6847 nos.) are in close proximity to the project site. Project Proponent shall prepare and implement an action plan for environmental safeguard measures to minimise the impact on the habitation of the locals. The company shall also include these locations in its environmental monitoring programme	Being complied. Environmental safe guard measures are being implemented. Environmental quality of Somalapura, Yeshwanthnagar villages is being monitored, summary of quality report is enclosed as annexure -1
v.	Tailings from Iron Ore beneficiation plant shall be dewatered in filter press and no slime /tailing pond shall be permitted	Not complied. The project is under construction stage. However dry tailing system will be implemented
vi.	Performance test shall be conducted on all pollution control systems every year and report shall be submitted to Integrated Regional Office of the MoEF&CC	Not complied. The project is under construction stage. However performance test of pollution control equipment's will be carried out after operation of equipment's, in addition to initial performance test. The reports of assessment will be submitted to ministry
vii.	Three tier Green Belt shall be developed in a time frame of one year with native species all along the periphery of the project site of adequate width and tree density shall not be less than 2500 per ha. Survival rate of green belt developed shall be monitored on periodic basis to ensure that damaged plants are replaced with new plants in the subsequent years. Compliance status in this regard, shall be submitted to concerned Regional Office of the MoEF&CC	Being complied. The adequate width of greenbelt along the boundary is being developed. Further density improvement will be carried out. The survival rate data of plantation is maintained. The Greenbelt development summary details is enclosed as annexure -2
viii.	There are around 190 nos. of trees proposed to	Complied.

	be felled at the project site. PP shall explore the possibility to limit the tree felling to bare minimum and with the permission from Competent Authority. The compensatory afforestation shall be done as per the guidelines of the Forest Department	Permission from forest authority was obtained & copy enclosed as Annexure -3. We have minimized the tree felling to the bare minimum and necessary compensatory afforestation is made.
ix.	Greening and Paving shall be implemented in the plant area to arrest soil erosion and dust pollution from exposed soil surface	Not complied. The roads are under construction. Also necessary greening and paving will be implemented
x.	Following additional arrangements to control fugitive dust shall be provided:	
	a. Fog / Mist Sprinklers at all on bulk raw material storage area (at the transfer points) like Iron Ore, Coal and for Fly Ash and similar solid waste storage areas.	Not complied. The project is under construction. However, fog/mist sprinklers will be installed
	b. Proper covered vehicle shall be used while transport of materials.	Not complied. The project is under construction. However, action will be implemented to ensure vehicles will be covered for transport of materials
	c. Wheel washing mechanism shall be provided in entry and exit gates with complete recirculation system.	Not complied. The project is under construction. However, Tyre washing system will be implemented.
xi.	Dust emission from all the stacks shall be less than 30 mg/Nm <sup>3</sup>	Not complied. The project is under construction. However, all the pollution control equipment's are designed to meet emission norms of < 30mg/Nm <sup>3</sup> .
xii.	6600 m <sup>3</sup> /day of water requirement shall be met from Tungabhadra Dam. No ground water abstraction is permitted for expansion project	Not complied The water drawl scheme from Tungabhadra dam is under progress.
xiii.	Rain water harvesting shall be implemented to recharge/harvest water as per the action plan submitted in the EIA/EMP report	Not complied. The rain water harvesting system and recharge system is under implementation
xiv.	The proposed project shall be designed as "Zero Liquid Discharge" Plant. No waste water will be discharged outside the plant boundary	Not complied. The project is under construction. However, we will

		implement zero discharge of waste water.
xv.	A proper action plan must be implemented to dispose of the electronic waste generated in the industry	Not complied. The project is under construction. However, SOP & MoU will be made with KSPCB authorized E waste vendors for safe handling & disposal of e waste as per latest E waste management rules
xvi.	All the commitments made to the public during the Public Hearing/Public Consultation shall be satisfactorily implemented. The action plan based on the social impact assessment study of the project as per the EMP in accordance to the Ministry's OM dated 30.09.2020 shall be strictly implemented and progress shall be submitted to the Regional Office of MoEF&CC	Being complied. The project is under construction stage. However, The action plan to fulfill public consultation commitments is being implemented. The progress report will be submitted to ministry periodically. Expenditure made during April to Sept 2023 is enclosed as Annexure -4
xvii.	The Plastic Waste Management Rules 2016, inter-alia, mandated banning of identified Single Use Plastic (SUP) items with effect from 01/07/2022. In this regard, CPCB has issued a direction to all the State Pollution Control Boards (SPCBs)/Pollution Control Committees (PCCs) on 30/06/2022 to ensure the compliance of Notification published by Ministry on 12/08/2021. The technical guideline issued by the CPCB in this regard is available at <a href="https://cpcb.nic.in/technical-guidelines-3/">https://cpcb.nic.in/technical-guidelines-3/</a> . All the project proponents are hereby requested to sensitize and create awareness among people working within the Project area as well as its surrounding area on the ban of SUP in order to ensure the compliance of Notification published by this Ministry on 12/08/2021. A report, along with photographs, on the measures taken shall also be included in the six monthly compliance report being submitted by the project proponents	Being Complied. Single Use Plastic ban awareness program conducted for workers and school children. The photographs of awareness program are enclosed as annexure -5.
xviii.	The project proponent shall adopt the Clean Air practices like mechanical collectors, wet scrubbers, fabric filters (bag houses), electrostatic precipitators, combustion systems (thermal oxidizers), condensers, absorbers,	Not complied. The project is under construction stage. However, we have selected Electrostatic Precipitator, bag filter etc to

	adsorbers, and biological degradation. Controlling emissions related to transportation shall include emission controls on vehicles as well as use of cleaner fuels. Sufficient numbers of additional truck mounted Fog/Mist water cannons shall be procured and operated regularly inside the project premises and also in the surrounding villages to arrest suspended dust in the atmosphere	meet the norms of <30mg/nm3. Other dust control measures as prescribed will be implemented.
xix.	The PP shall obtain a certificate from the State Forest Department that the project site doesn't have any forest land before commencing of the activities	Complied. The Certificate obtained from forest dept. stating there is no forest land in the project area. The copy of same was submitted to MoEFCC as part of EIA report & EDS compliance. The copy of certificate is also enclosed as annexure 6
xx.	The recommendations of the approved Site-Specific Wildlife Management Plan shall be implemented in consultation with the State Forest Department. The implementation report shall be furnished along with the six-monthly compliance report to the concerned Regional Office of the MoEF&CC	Being complied. The project is under construction stage. However, Greenbelt development is being made, copy enclosed as annexure-2, other wildlife conservation plan will be implemented. The progress report will be submitted to the ministry periodically
<b>B</b>	<b><u>General conditions</u></b>	
<b>I.</b>	<b>Statutory compliance:</b>	
i.	The Environment Clearance (EC) granted to the project/ activity is strictly under the provisions of the EIA Notification, 2006 and its amendments issued from time to time. It does not tantamount/ construe to approvals/ consent/ permissions etc., required to be obtained or standards/conditions to be followed under any other Acts/Rules/Subordinate legislations, etc., as may be applicable to the project	Noted and agreed
<b>II.</b>	<b>Air quality monitoring and preservation</b>	
i.	The project proponent shall install 24x7 continuous emission monitoring system at process stacks to monitor stack emission as well as 04 Nos. Continuous Ambient Air Quality Station (CAAQS) for monitoring AAQ parameters with respect to standards	Not complied. The project is under construction stage. However, the CAAQMS, CEMS will be installed and connected to SPCB, CPCB online servers. Further the equipment

	prescribed in Environment (Protection) Rules 1986 as amended from time to time. The CEMS and CAAQMS shall be connected to SPCB and CPCB online servers and calibrate these systems from time to time according to equipment supplier specification through labs recognized under Environment (Protection) Act, 1986 or NABL accredited laboratories	will be through MoEFCC& NABL authorized laboratories
ii.	The project proponent shall monitor fugitive emissions in the plant premises at least once in every quarter through laboratories recognized under Environment (Protection) Act, 1986 or NABL accredited laboratories	Complied. The air quality is being monitored through MoEFCC& NABL accredited laboratories M/s MSV Analytical Laboratories. The monitoring summary is enclosed as Annexure -1
iii.	Sampling facility at process stacks and at quenching towers shall be provided as per CPCB guidelines for manual monitoring of emissions	Not complied. The project is under construction. However it may be noted that Quenching towers are not part of project as there is no coke oven unit proposed. Sampling facilities for the stacks will be provided as per CPCB guidelines.
iv.	Appropriate Air Pollution Control (APC) system shall be provided for all the dust generating points including fugitive dust from all vulnerable sources, so as to comply prescribed stack emission and fugitive emission standards	Not complied. The project is under construction. However, Appropriate air pollution control system will be installed to meet the norms
v.	The project proponent shall provide leakage detection and mechanized bag cleaning facilities for better maintenance of bags	Not complied. The project is under construction. However, leakage detection system will be provided
vi.	Sufficient number of mobile or stationery vacuum cleaners shall be provided to clean plant roads, shop floors, roofs, regularly	Not complied. The project is under construction. However, vacuum cleaners will be deployed as guided
vii.	Recycle and reuse iron ore fines, coal and coke fines, lime fines and such other fines collected in the pollution control devices and vacuum cleaning devices in the process after briquetting/ agglomeration	Not complied. The project is under construction. However, the fines from pollution control devices will be used for further usage in downstream industries.

viii.	The project proponent use leak proof trucks/dumpers carrying coal and other raw materials and cover them with tarpaulin	Not complied. The project is under construction. However, action will be taken to ensure raw material trucks are covered
ix.	Facilities for spillage collection shall be provided for coal and coke on wharf of coke oven batteries (Chain conveyors, land based industrial vacuum cleaning facility)	Not complied. This condition is not applicable, as there is no coke oven plant proposed
x.	Land-based APC system shall be installed to control coke pushing emissions	Not complied. This condition is not applicable, as there is no coke oven plant proposed
xi.	Monitor CO, HC and O <sub>2</sub> in flue gases of the coke oven battery to detect combustion efficiency and cross leakages in the combustion chamber	Not complied. This condition is not applicable, as there is no coke oven plant proposed
xii.	Vapor absorption system shall be provided in place of vapour compression system for cooling of coke oven gas in case of recovery type coke ovens	Not complied. This condition is not applicable, as there is no coke oven plant proposed
xiii.	Wind shelter fence and chemical spraying shall be provided on the raw material stock piles	Not complied. The project is under construction. However, wind fence and chemical spraying will be implemented
xiv.	Design the ventilation system for adequate air changes as per prevailing norms for all tunnels, motor houses, Oil Cellars	Not complied. The project is under construction. However, action will be taken to ensure adequate air changes
<b>III. Water quality monitoring and preservation</b>		
i.	The project proponent shall install 24x7 continuous effluent monitoring system with respect to standards prescribed in Environment (Protection) Rules 1986 vide G.S.R 277(E) dated 31 <sup>st</sup> March 2012 (Integrated iron & Steel); G.S.R 414 (E) dated 30 <sup>th</sup> May 2008 (Sponge Iron) as amended from time to time; S.O. 3305 (E) dated 7 <sup>th</sup> December 2015 (Thermal Power Plants) as amended from time to time and connected to SPCB and CPCB online servers and calibrate these system from time to time according to equipment supplier specification through labs recognized under Environment (Protection) Act, 1986 or NABL accredited laboratories	Not complied. The project is under construction. However, effluent monitoring system will be implemented as applicable

ii.	The project proponent shall monitor regularly ground water quality at least twice a year (pre- and post-monsoon) at sufficient numbers of piezometers/sampling wells in the plant and adjacent areas through labs recognized under Environment (Protection) Act, 1986 and NABL accredited laboratories	Complied. Ground water quality is being monitored through MoEFCC accredited laboratory M/s MSV Analytical Laboratory, summary report is enclosed as annexure - 1.
iii.	Sewage Treatment Plant shall be provided for treatment of domestic wastewater to meet the prescribed standards	Not complied. The project is under construction. However, Sewage treatment plant of 25KLD Membrane Bio Reactor based system will be installed to treat the sewage.
iv.	Garland drains and collection pits shall be provided for each stock pile to arrest the run-off in the event of heavy rains and to check the water pollution due to surface run off	Not complied. The project is under construction. However, garland drains will be provided
v.	Tyre washing facilities shall be provided at the entrance of the plant gates	Not complied. The project is under construction. However, Tyre washing facilities will be provided
vi.	Water meters shall be provided at the inlet to all unit processes in the steel plants	Not complied. The project is under construction. However, water meters will be provided
<b>IV.</b>	<b>Noise monitoring and prevention</b>	
i.	Noise pollution shall be monitored as per the prescribed Noise Pollution (Regulation and Control) Rules, 2000 and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report	Complied. The Noise monitoring is being carried out through MOEF& NABL accredited laboratory M/s MSV Analytical Laboratory, summary report is enclosed as annexure -1.
<b>V</b>	<b>Energy Conservation measures</b>	
i.	Use torpedo ladle for hot metal transfer as far as possible. If ladles not used, provide covers for open top ladles.	Not complied. Not applicable for our project as there is no hot metal generation and transfer
ii.	Restrict Gas flaring to < 1%	Not complied. Not applicable for our project, there is no gas flaring proposed
iii.	Provide solar power generation on roof tops of buildings, for solar light system for all common areas, street lights, parking around project area	Being complied. The project is under construction. However, solar LED

	and maintain the same regularly	lighting systems are being installed.
iv.	Provide LED lights in their offices and residential areas	Being Complied. LED bulbs are being used
v.	Ensure installation of regenerative/recuperative type burners on all reheating furnaces	Not complied. Not applicable for our project, as there is no reheating furnace is proposed
<b>VI</b>	<b>Waste management</b>	
i.	Oil Collection pits shall be provided in oil cellars to collect and reuse/recycle spilled oil. Oil collection trays shall be provided under coils on saddles in cold rolled coil storage area	Not complied. The project is under construction. However, oil collection system /trays will be provided near oil storage area
ii.	Kitchen waste shall be composted or converted to biogas for further use	Not complied. The project is under construction. However, Food waste composter machine will be installed
<b>VII</b>	<b>Green Belt</b>	
i.	Green belt shall be developed in an area equal to 33% of the plant area with native tree species in accordance with CPCB guidelines. The greenbelt shall inter alia cover the entire periphery of the plant	Being complied. Greenbelt is being under development. The greenbelt will be developed as per guidelines
ii.	The project proponent shall prepare GHG emissions inventory for the plant and shall submit the program for reduction of the same including carbon sequestration by trees in the plant premises	Not complied. The project is under construction. Estimate of GHG emissions and carbon sequestration is prepared as part of EIA report and submitted to ministry. Latest modern technologies like tower mill, filter press with dry tailing management etc will be implemented. The above technologies will reduce the carbon footprint of operations compared to conventional methods. Further the carbon sequestration by afforestation is already under progress. Carbon footprint reporting will be initiated once the plant is in operation. The report of implementation will be

		submitted to Ministry
iii.	Project proponent shall submit a study report on Decarbonisation program, which would essentially consist of company's carbon emissions, carbon budgeting/ balancing, carbon sequestration activities and carbon offsetting strategies. Further, the report shall also contain time bound action plan to reduce its carbon intensity of its operations and supply chains, energy transition pathway from fossil fuels to Renewable energy etc. All these activities/ assessments should be measurable and monitorable with defined time frames	Not complied. The project is under construction. Estimate of GHG emissions and carbon sequestration is prepared as part of EIA report and submitted to ministry.  However, Decarbonisation program will be implemented after operational stage
<b>VIII</b>	<b>Public hearing and Human health issues</b>	
i.	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented	Being complied. Onsite emergency plan covering the risk and mitigation plan is approved by Director of Factories, Boilers, GOK copy enclosed as annexure - 7 The emergency system is being implemented accordingly
ii.	The project proponent shall carry out heat stress analysis for the workmen who work in high temperature work zone and provide Personal Protection Equipment (PPE) as per the norms	Not complied. The project is under construction stage. However, Heat stress analysis will be implemented. Suitable PPE are being provided
iii.	Occupational health surveillance of the workers shall be done on a regular basis and records maintained	Being complied. Pre-employment medical checkup is being carried out. Further periodical medical check up will be made
<b>IX</b>	<b>Environment Management</b>	
i.	The project proponent shall comply with the provisions contained in this Ministry's OM vide F.No. 22-65/2017-IA.III dated 30/09/2020	Being complied. Action plan is being implemented for corporate environment responsibility. The details are enclosed as annexure - 4
ii.	The company shall have a well laid down environmental policy duly approve by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/deviation/violation of the environmental / forest / wildlife norms /	Being complied. Environment policy is prepared. Copy of same is enclosed as annexure -8

	conditions. The company shall have defined system of reporting infringements / deviation / violation of the environmental / forest / wildlife norms / conditions and / or shareholders / stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report	
iii.	A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly to the head of the organization	Complied. Environment cell is setup with qualified environmental officer under control of project head & CEO
<b>X</b>	<b>Miscellaneous</b>	
i.	The project proponent shall make public the environmental clearance granted for their project along with the environmental conditions and safeguards at their cost by prominently advertising it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days and in addition this shall also be displayed in the project proponent's website permanently	Complied. Paper advertisement is made. Copies of paper advertisement are enclosed as annexure -9 The EC is also displayed in company website.  <a href="https://rpcl.in">https://rpcl.in</a>
ii.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt	Complied. Copies submitted to local bodies. Acknowledgment letter copies enclosed as annexure -10
iii.	The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis	Complied. The Half yearly compliance is uploaded in company website
iv.	The project proponent shall monitor the criteria pollutants level namely; PM10, SO2, NOx (ambient levels as well as stack emissions) or critical sectoral parameters, indicated for the projects and display the same at a convenient location for disclosure to the public and put on the website of the company	Being complied. The project is under construction. Ambient levels are being monitored. The summary of monitored report is displayed in company website along with half yearly compliance report. Further Environmental display board will be installed & updated regularly.
v.	The project proponent shall submit six-monthly	Complied.

	reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal	Last Six monthly compliance was submitted in the MoEF online portal vide track no EC/COMPLIANCE/6484922/2023. The compliance report is being updated half yearly in portal.
vi.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company	Complied. The last period environmental statement in form v was submitted to MoEFCC & KSPCB vide letter ref no RPCL/23-24/C-197 & the same is displayed in website. Further, form V will be updated yearly.
vii.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project	Complied. The project construction work was started in 2 <sup>nd</sup> May 2023. The same was communicated to Ministry vide letter ref no RPCL/23-24/C-153 dtd 18/05/23. Further we will intimate the production start date in future.
viii.	The project proponent shall abide by all the commitments and recommendations made in the EIA/EMP report, commitment made during Public Hearing and also that during their presentation to the Expert Appraisal Committee	Noted and agreed.
ix.	No further expansion or modifications in the plant shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC)	Noted and agreed. No further expansion /modification will be made without prior approval of MoEFCC
x.	The PP shall put all the environment related expenditure, expenditure related to Action Plan on the PH issues, and other commitments made in the EIA/EMP Report etc. in the company web site for the information to public/public domain. The PP shall also put the information on the left over funds allocated to EMP and PH as committed in the earlier ECs and shall be carried out and spent in next three years, in the company web site for the information to public/public domain	Being complied. The Action plan as per MoEF&CC O.M. dated 30/09/2020 is displayed as annexure -1 to EC. The expenditure made are uploaded as annexure to half yearly EC compliance report and uploaded in RPCL website.
xi.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should	Noted and agreed. We will extend the full support to the authorities

	extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports	
9	The Ministry reserves the right to stipulate additional conditions, if found necessary at subsequent stages and the project proponent shall implement all the said conditions in a time bound manner. The Ministry may revoke or suspend the environmental clearance, if implementation of any of the above conditions is not found satisfactory	Noted and agreed
10	Concealing factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of the Environment (Protection) Act, 1986	Noted and agreed
11	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010	Noted and agreed
12	The above conditions shall be enforced, <i>inter-alia</i> under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter	Noted and agreed
13	This issues with approval of the competent authority	Noted and agreed
